TECHNICAL INSTALLATION GUIDE

Plaswood Stiles and Gates can be incorporated into any Plaswood system, making accessibility easy for everyone. A solution that makes sense environmentally, aesthetically and economically.

Product Range

Gates

Plaswood gates compliment our fencing systems, allowing for accessibility where and when needed. The gates are constructed to allow pedestrian and maintenance vehicle access. Supplied fully fabricated but fixings supplied by installer.

Stiles

Stiles are still used within fencing systems, usually alongside Kissing Gates to cover all aspects of accessibility. We generally supply these items in flat pack kit form.

Additional Options

TOPS AVAILABLE FOR POSTS

Black posts can have either flat, chamfered or bevelled tops. All birdsmouth/trip rail posts have inverted V notches and brown, grey or green posts are flat tops only.

MORTISING REQUIREMENTS

A mortising service is available to accept the rails for intermediate, corner and end posts. We will need clarification on where the mortises need to be positioned on the posts when any order is placed.

TOPS AVAILABLE FOR PICKETS/PALES

Flat or Semi-Circular

HEIGHTS OF FENCING

4' (1220mm) above ground level

5' (1525mm) above ground level
